

First Semester B.Tech Syllabus for Admission Batch 2016-17

First Semester								
Code	Course Name	Theory				Practical		
		Hours/ Week L/T	Credit Theory	University Marks	Internal Evaluation	Hours/ Week L/T	Credit Practical	Marks
BS	Applied Mathematics-I	3-1	4	100	50	-	-	-
BS	Applied Chemistry/Applied Physics	3-0	3	100	50	2	1	50
ES	Basics of Mechanical Engineering / Basics of Civil Engineering	3-0	3	100	50	2	1	50
MC & GS	Environmental Studies & Health Care Engineering/ Professional Ethics	3-0	3	100	50			
HS	English Communication Skill	3-0	3	100	50	2	1	50
ES	Computer Lab					4	2	100
ES	Engineering Workshop/ Engineering Graphics lab.	2-0	1	-	50	4	2	100
Total		18	17	500	300	14	7	400
Total Marks: 1200								
Total Credits: 25								

APPLIED MATHEMATICS-I

1st Semester

Module-I (13 Hours)

Calculus:

Asymptote, Curvature, Partial differentiation, Taylor's theorem for function of two variable, Maxima and Minima for function of two variables.

Module II (12 Hours)

Differential Equation-1

Differential Equation: First order differential equations, Separable Equation, Exact differential equation,

Linear differential equation, Bernoulli's equation and application to Electrical circuits.

Differential Equation-II

Linear differential equation of second and higher order, Homogeneous equation with constant co-efficient, Euler-Cauchy equations, Solution by undetermined co-efficient, Solutions by variation of parameters, Modeling of electric circuits

Module-III (10 Hours)

Series solution of differential equations, Power series method, Legendre equation and Legendre polynomials,

Linear algebra, Matrices, Vectors, Determinants, System of linear equations,

Module-IV (10 Hours)

Eigen values and eigen vectors, Symmetric and skew-symmetric matrices, Orthogonal matrices, Complex matrices, Hermitian and skew-Hermitian matrices, Unitary matrices and similarity of matrices.

TextBooks:

1. Differential Calculus by Santi Narayan and Mittal, Chapters 14, 15 Publication
2. Advanced Engineering Mathematics by E. Kreyszig, Tenth Edition, Willey
3. Higher Engineering Mathematics by B.V.Raman, Chapter 4.1,4.2, McGraw Hills Education

References:

1. English Mathematics by paland s Bhunia, Oxford Publication
2. Ordinary and Partual Differential equations by J. Sihna Ray and S Padhy, Kalyani Publishers
3. Advance Engineering Mathematics by P.V.O'NEIL, CENGAGE

APPLIED PHYSICS

Module-I (07 Classes)

Classical Dynamics

Principle of virtual work, De-Alembert Principle, Action principle, Lagrange equation of motion and its application to Simple Harmonic oscillator. Velocity dependent potential.

Oscillation & Waves

Simple Harmonic Oscillation, damped harmonic oscillation, Forced oscillator, resonance, coupled oscillation, concept of wave and wave equation.

OPTICS

Concept of interference, two source interference pattern, Bi-prism, Michelson Interferometer & measurement of wavelength.

Diffraction: Hugen's principle, Fresnel & Frauhoper's diffraction, Zone plate.

Module-II (07 Classes)

Solid State Physics

Crystalline and amorphous solid, unit cell, Miller Indices, Reciprocal lattice, Bragg's law, Brillouin's zone, concept of fermions, Maxwell-Boltzmann, Fermi-Dirac and Bose-Einstein distribution function (only statement and formula), Concept of Fermions and Bosons. Classification of materials: metals, semiconductor and insulator in terms of band theory

LASER and Fibre Optics:

principle and application -stimulated emission, population inversion, Lasing material (solid and gas), He-Ne laser, Rubi- LASER, Application of LASER (Engineering Application), Principle of optical fibre and its application to communication.

Module-III (08 Classes)

Electromagnetism- Student will be familiarized with some basic used in vector calculus prior to development of Maxwell's electromagnetic wave equations. No proof of theorems and laws included in this unit expected- statement and interpretation should sufficient.

a) Vector calculus: gradient of scalar field, divergence, curl of vector field (Only Physical significance) Gauss divergence theorem, Stoke's theorem, Green's theorem (Only Statements)

b) Gauss's law of electrostatics in free space and in a medium(Only statements)electric displacement(**D**)magnetic Induction (**B**),Amperes circuital law (Only statements), displacement current, Faraday's law of electromagnetic induction(Only statements).

Module-IV(08 Classes)

Quantum Physics: Elementary concepts of quantum physics formulation to deal with physical systems.

a) Need for Quantum physics-Historical overviews, Particle aspects of radiation-Black body radiation, photoelectric effect, Compton scattering, pair production.(No derivations), Wave aspect of particles- matter wave, de Broglie Hypothesis, Heisenberg Uncertainty principles-Statement, Interpretation and example

First Semester B.Tech Syllabus for Admission Batch 2016-17

b) Basic features of Quantum mechanics- Transition from deterministic to probabilistic, States of system- Wave function, probability density, superposition principle, observables and operators, expectation values. Schrodinger equation-Time dependent and time independent, wave packets.

Text Books:

1. Principle of Physics Vol. I & Vol. II by Md. M. Khan & S. Panigrahi (Cambridge Univ. Press).
2. Engineering Physics by D.R. Joshi, Mc Graw Hill
3. Engineering Physics by D.K Bhattacharya and Poonam Tandon, Oxford University Press

Reference Book:

1. Quantum Mechanics by Powel & Craseman.
2. Optics- A. K. Ghatak
3. Electricity & Magnetism : E.M. Purecell
4. Introduction to Electrodynamics- David J. Griffiths, PHI Publication
5. Concepts of Modern Physics – Arthur Beiser.
6. Engineering Physics- K.P.Mishra and P. Pattojoshi, Scitech Pub.
7. Concepts in Engineering Physics-I Md. N. khan, Alok Publication.
8. Physics-I for engineering degree students-B.B. Swain and P.K.Jena.
9. An Introduction to Machanics by D.Klippner & R. Kolenkow, TMH

APPLIED PHYSICS LABORATORY

A student is expected to perform ten experiments form the list given below.

1. Determination of Young's modulus by Searle's method.
2. Determination of Rigidity modulus by static method.
3. Determination of surface tension by capillary rise method.
4. Determination of acceleration due to gravity by Bar / Kater's pedulum.
5. Determination of unknown resistance using meter bridge.
6. Determination of wave length of light by Newton's ring apparatus.
7. Determination of grating element of a diffraction grating.
8. Plotting of characteristic curve of a PN junction diode.
9. Plotting of characteristic curves of BJT.
10. Verification of laws of vibration of string using sonometer.
11. Determination of wavelength of laser source by diffraction rating method.
12. Study of Hall Effect.
13. Study of RC circuit.
14. Determination of Young's modulus by bending of beams.
15. Michelson Interferometer.
16. Determine of reduction factor of the given tangent galvanometer and horizontal component of earth's magnetic field by using tangent galvanometer.

APPLIED CHEMISTRY

Course Objectives:

- (1) To understand the basics of molecular interactions.
- (2) Introductory idea about organometallics and their catalytic applications.
- (3) Basics of fuels and corrosion chemistry.

Module I:

Quantum Chemistry and Spectroscopy: Basic concepts and postulates of quantum mechanics. Introduction to Schrodinger Wave Equation. Particle in a box: Energy levels, quantum numbers and selection rule.

Spectroscopy: Lambert Beer's Law, Principles and applications of UV-Visible Molecular Absorption Spectroscopy; Chromophores, applications to colorimetry. Effect of conjugation on chromophores, Absorption by aromatic systems, Introductory idea on Rotational and Vibrational Spectroscopy-Principles and application to diatomic molecules.

[7 Classes]

The phase rule: Statement of Gibb's phase rule and explanation of the terms involved, Phase diagram of one component system – water and sulfur system, Condensed phase rule, Phase diagram of two component system – Eutectic Bi-Cd system.

[3 Classes]

Module II:

(10

classes)

Organometallics: Introduction to organometallics, EAN rule; classification, nomenclature and characteristics of organometallic compounds. Applications of organometallic compounds and catalyst in alkene isomerization hydrogenation and hydroformylation (detail mechanisms are to be excluded).

[10

Classes]

Module III:

Fuels: Classification of fuels, calorific value. (Determination by Dulong's formula), G.C.V. and N.C.V. Liquid fuels: Classification of petroleum, Refining of petroleum, Cracking, Knocking and anti knocking, cetane and octane numbers. Unleaded petrol, synthetic petrol, power alcohol. Gaseous Fuel: Producer gas, Water gas, LPG, CNG, Kerosene gas, Combustion calculation.

[10 Classes]

Module-IV

(6classes)

Corrosion: Electrochemical theory of corrosion, galvanic series, Types of corrosion; Differential metal corrosion, Differential aeration corrosion (Pitting and water line corrosion), Stress corrosion (caustic embrittlement in boilers), Factors affecting, Metal coatings – Galvanizing and Tin plating, Corrosion inhibitors, cathodic protection.

First Semester B.Tech Syllabus for Admission Batch 2016-17

Text Books:

1. Text Book in Applied Chemistry by A. N. Acharya and B. Samantaray, Pearson India.
2. Introductory to Quantum Chemistry by A. K. Chandra. , 4th Edition, Mcgraw Hill Education.
3. Fundamentals of Molecular & Spectroscopy by Banwell, Tata McGraw Hill Education.
4. Physical Chemistry by Gordon M. Barrow, McGraw-Hill
5. Engineering Chemistry, 12th Edition, Author: Wiley India Editorial Team Publishers Wiley.
6. Engineering Chemistry: Fundamentals and Applications. Shikha Agarwal. Cambridge University Press.
7. Engineering Chemistry, Jain and Jain, Dhanpat Rai Publiation.

Reference Books:

1. Inorganic Chemistry by Donald A. Tarr, Gary Miessler, Pearson India, Third Edition.
2. Quantum Chemistry by Ira N. Levine, Pearson 7th Edition.
3. Molecular Spectroscopy, Ira N. Levine, John Wiley and Sons
4. Modern Spectroscopy – A Molecular Approach, by Donald McQuarrie and John Simon, published by University Science Books.
5. Inorganic Chemistry by W. Overton, Rounk and Armstrong, Oxford Univesity Press, 6th edition.

APPLIED CHEMISTRY LAB. (0-0-2)

B.Tech. (for all branches):

1. Determination of amount of sodium hydroxide and sodium carbonate in a mixture.
2. Determination of total hardness of water by EDTA method.
3. Estimation of calcium in calcium in limestone.
4. Determination of percentage of available chlorine in a sample of bleaching powder.
5. Preparation of Phenolphthalein.
6. Acid-Base Titration by Potentiometry.
7. Preparation of buffer solution and determination of pH of a buffer solution.
8. Standardization of KMnO_4 using sodium oxalate. Determination of ferrous iron in Mohr's salt by potassium permanganate.
9. Determination of partition coefficients of iodine between benzene and water.
10. Determination of rate constant of acid catalyzed hydrolysis reaction.
11. Determination of concentration of a coloured substance by spectrophotometer.
12. Determination of dissolved oxygen in a sample of water.
13. Determination of Viscosity of a lubricating oil by Red Wood viscometer.
14. Determination of Flash point of a given oil by Pensky-Marten's flash point approach.
15. Determination of Critical Micelle concentration (CMC) of an ionic surfactant (Both cationic and anionic).

BASIC MECHANICAL ENGINEERING

Theory L/T (Hours per week): 3/0, Credit: 3

MODULE-1

Thermodynamics: (9 classes)

Systems, Properties, Process, State, Cycle, Internal energy, Enthalpy, Zeroth Law, First law and Second Law of Thermodynamics, Basic Concept of Entropy, Properties of ideal gas., Properties of pure substances, Steam formation, Types of Steam, Enthalpy, Specific volume, Internal energy and dryness fraction of steam, use of Steam tables. Related numericals.

MODULE-2: (11 classes)

Application of Thermodynamics:

Air compressors, Steam Power Plant, Refrigerators and Heat pump, I.C. Engines (Brief Description of different components of above mentioned systems and working principles with Schematic diagram only)

Introduction to Fluid Mechanics and Heat transfer:

Fluid properties, Pascal's law, Buoyancy, Bernoulli's theorem, pipe flow, hydraulic turbines and pumps. Different modes of heat transfer, heat exchangers (basics).

MODULE-3(8 classes)

Production processes

Turning , Casting, Welding and forming (Drawing, Forging, Extrusion) (working principles with Schematic diagram only)

Engineering materials:

Classification of Engineering materials. Mechanical properties of Steel, Aluminum and Plastics.

MODULE-4 (8 classes)

Fasteners and Power transmission devices:

Nut, Bolt, Screw, Rivets, Belt, Rope, Gear drives. Coupling, clutch, brakes. (Basics, applications, advantages and limitations only).

Mechanical Measurements:

Temperature, pressure, velocity, flow, strain, force, torque measurements. (Working principle only).

Text books

1. Basic Mechanical Engineering by Pravin Kumar, Pearson
2. Basic Mechanical Engineering by A R Israni, P K Shah, BS Publications
3. Text book of Elements of Mechanical Engineering, S T Murthy, Universities press

Reference books

1. Basic Mechanical Engineering by .D. Mishra, P.K Parida, S.S.Sahoo, India Tech Publishing company
2. Basic and applied Thermodynamics by P. K. Nag, Tata Mc Graw Hill
3. Elements of Mechanical Engineering by J K Kittur and G D Gokak, Willey
4. Basic Mechanical Engineering by Basant Agrawal, C M Agrawal, Willey
5. Engineering Thermodynamics by P. Chattopadhaya, Oxford University Press

BASIC MECHANICAL ENGINEERING PRACTICAL

(HOURS PER WEEK): 2, CREDIT: 1

(Minimum 8 experiments/studies)

1. Determination of equilibrium of coplanar forces.
2. Determination of Moment of Inertia of Flywheel
3. Model study of Fire Tube Boilers
4. Model study of Water Tube Boilers
5. Model study of Two stroke I.C. Engine
6. Model study of Four stroke I.C. Engine
7. Model study of Refrigerator
8. Model study of Automobile Parts
9. Model study of Water Turbines
10. Model study of Water pumps
11. Model study of Heat Exchanger.
12. Determination of velocity ratio of belt drive
13. Study of Gears and Gear trains
14. Study of Mechanical fasteners
15. Verification of Bernoulli's Theorem and its application to Venturimeter.
16. Calibration of Bourdon Tube Pressure gauge and measurement of pressure using manometers

BASICS OF CIVIL ENGINEERING (3-0-1)

MODULE-I (10 classes)

Mechanics: Concurrent forces on a plane – Composition and resolution of forces and equilibrium of concurrent coplanar forces, Method of projections, Methods of moment, Friction. Parallel forces in a plane- Two parallel forces, General case of parallel forces, Center of parallel forces in a plane and center of gravity- centroids of composite plane figure and curves, Distributed parallel forces in a plane. General case of forces in a plane- composition of forces in a plane and equilibrium of forces in a plane.

Module-II (10 classes)

Plane trusses- method of joints and method of sections. Moments of Inertia- Plane figure with respect to an axis in its plane and perpendicular to the plane- parallel axis theorem, Moment of Inertia of material bodies.

Rectilinear Translation- Kinematics- Principles of Dynamics- D'Alemberts Principles, Momentum and impulse, Work and Energy- impact

Module-III (8 classes)

Building Material and Building Construction: Bricks: Brick as a construction material and its importance, qualities of a good brick, Stone: classification, composition and characteristics, Cement: Classification, tests for cement, uses of cement, types of cement, Concrete: Quality of mixing water, Workability, vibration of concrete, concrete mix design, Grade and strength of Concrete. Building Components and their basic requirements, Foundation: Types of foundation, spread foundations, pile foundations, Mortar, Stone masonry, brick masonry, roof, floors, building services: air conditioning, fire protection, ventilation.

Module-IV (8 classes)

Surveying: Linear measurement and chain survey: Use of chains and tapes for measurement of correct length of lines, direct and indirect ranging, Compass surveying: Use of prismatic compass, bearing of a line. Local attraction, Introduction to modern surveying instruments EDM and Total Station.

Transport, Traffic and Urban Engineering: Introduction to planning and design aspects of transportation engineering, different modes of transport, highway engineering, rail engineering, airport engineering, traffic engineering, urban engineering

TEXT BOOKS

1. Engineering Mechanics by S Timoshenko, D.H Young and J.V.Rao, McGraw Hill
2. Basic Civil Engineering, S. Gopi, Pearson
3. Building Construction, Sushil Kumar, Standard Publishers Distributors
4. Surveying and Levelling by R. Subramanian, Oxford University Press

REFERENCE BOOKS

1. Engineering Mechanics by K.L.Kumar, McGraw Hill
2. Engineering Materials, S.C. Rangwala, Charotar Publishing House
3. Building Material and Construction, G C Sahu, Joygopal Jena, McGraw Hill
4. Surveying Vol-1 by R Agor, Khanna Publishers
5. Basic Civil Engineering, M.S. Palanichamy, McGraw Hill

BASICS OF CIVIL ENGINEERING LAB

1. Polygon Law of Coplanar Forces
2. Support Reactions of a beam
3. Experiment on trusses to calculate the force in the member of a simple truss
4. Friction experiment on inclined plane for determining coefficient of friction
5. Moment of inertia of fly wheel
6. Shape and size test of brick
7. Compressive strength of brick
8. Testing of chain and measurement of correct length of the line
9. Bearing of a line
10. Study of Total Station

TENTATIVE

ENVIRONMENTAL STUDIES AND HEALTH CARE ENGINEERING (3-0-0)

Objective: This course introduces the environmental consequences of Industries on the human health and methods for minimizing their impact through technology and legal system to the undergraduate engineering students.

Module-I [8 Periods]

Ecological concept, Ecosystem processes like energy flow, food chain, food web. Water cycle, oxygen cycle and nitrogen cycle. Environmental gradients and tolerance level of environment factors. Basics of Indian Environmental laws, Atmospheric chemistry and temperature profile. Soil pollution and its remedies, Origin and procedure of EIA.

Module-II [8 Periods]

Causes, effects and control of air, noise and water pollution, treatment of surface water and waste water (pre-, primary and secondary). DO, BOD and COD of waste water treatment process. Sources, properties and management of solid wastes and hazardous wastes. [6 Periods]

Module-III [6 Periods]

Occupational health and safety act and procedure. Hazard control measures in industries like steel, petroleum and pharmaceutical. First aid treatments.

Module-IV [8 Periods]

Environment and Human health:-

Occupational health – nutrition, control of communicable diseases, environmental sanitation, mental health. Prevention of occupational diseases through medical measures, engineering measures and legislation. Role of information technology in human health, causes, prevention and control of diseases like hepatitis, typhoid and malaria.

Text Book:

1. Environmental Studies by Dash & Kumar, India Tech Publication, New Delhi
2. Environmental Engineering and Safety by Mohapatra, Seven Seas Publication, Cuttack
3. Environmental Engineering & Safety by Dash and Panda, India Tech Publication, New Delhi.
4. Environmental Studies by R.Rajagopalan Oxford University Press
5. Environmental Science and Engineering, 2E, by Aloka Debi University Press

Reference:

1. Essentials of Community Health Nursing. By K. Park, M/s. Banarsidas Bhanot, Jabalpur
2. Environmental Studies by Dr. S. K. Dhameja, Kataria and Sons, New Delhi
3. Environmental Engineering, G. Kiely, McGraw Hill International Edition, New Delhi
4. Environmental Studies by Bharucha, University Press, Hyderabad.

PROFESSIONAL ETHICS

MODULE-I

Introduction to Ethics: 1.1 Basic terms- Moral, Ethics, Ethical dilemma, Emotional intelligence
1.2 Moral development theories of Kohlberg and Piaget 1.3 View on ethics by Aristotle 1.4
Governing factors of an individual's value system 1.5 Personal and professional ethics

MODULE-II

Profession and Professionalism: 2.1 Clarification of the concepts: Profession, Professional,
Professionalism, Professional accountability, Professional risks, Profession and Craftsmanship,
Conflict of interest 2.2 Distinguishing features of a professional 2.3 Role and responsibilities of
professionals 2.4 Professionals' duties towards the organization and vice-a-versa 3 Ethical
Theories: 3.1 Various ethical theories and their application- Consequentialism, Deontology,
Virtue theory, Rights Theory, Casuist theory 3.2 Ethical terms: Moral absolutism, Moral
Relativism, Moral Pluralism etc. 3.3 Resolving Ethical Dilemma

MODULE-III

Ethics in Engineering: 4.1 Purpose and concept of Engineering Ethics 4.2 Engineering as social
experimentation 4.3 Types of inquiry 4.4 Issues in engineering ethics 5 Engineers'
Responsibility and Safety: 5.1 Safety, Risk, Underestimating the risk, Over estimating the risk,
Risk-benefit analysis 5.2 Causes of an accident and identification of the preventive measures to
be taken 5.3 Case Studies

MODULE-IV

Global Ethical Issues: 6.1 Different ethical issues in business, environment, IT, Bioethics,
Intellectual Property Rights (IPR), Research, Media, CSR etc. 7 Ethical Codes: 7.1 Meaning and
the significance of ethical codes 7.2 The limitations of ethical codes.

RECOMMENDED BOOKS FOR REFERENCE:

1. R. Subramanian, "Professional Ethics", Oxford University Press, New Delhi, 2013
2. Mike W. Martin and Roland Schinzinger, "Ethics in Engineering", Tata McGraw Hill, New Delhi, 2013
3. Charles E Harris, Michael S Pritchard and Michael J Rabins, "Engineering Ethics – Concepts and Cases", Thompson Learning, 2003.
4. Daniel Albuquerque, "Business Ethics", Oxford University Press, New Delhi, 2013
5. Edmund G. Seebauer and Robert L. Barry, "Fundamentals of Ethics", Oxford University Press, New Delhi, 2012.

ENGLISH COMMUNICATION SKILL

Objectives:

- To develop the communication skills and soft skills of the students
- To enhance the ability of the students to participate in group discussions and personal interviews

Module	Contents	Class Hours
1	<p>The elements of communication (8 hours)</p> <p>1.1 the importance of communication through English at the present time</p> <p>1.2 the process of communication and factors that influence communication : sender, receiver, channel, code, topic, message, context, feedback, 'noise', filters and barriers</p> <p>1.3 the importance of audience and purpose</p> <p>1.4 the information gap principle : given and new information ; information overload</p> <p>1.5 verbal and non-verbal communication : body language</p> <p>1.6 comparing general communication and business communication</p>	8
2	<p>The sounds of English(12 hours)</p> <p>2.1 vowels, diphthongs, consonants, consonant clusters</p> <p>2.2 the International Phonetic Alphabet (IPA) ; phonemic transcription</p> <p>2.3 problem sounds</p> <p>2.4 syllable division and word stress</p> <p>2.5 sentence rhythm and weak forms</p> <p>2.6 contrastive stress in sentences to highlight different words</p> <p>2.7 intonation : falling, rising and falling-rising tunes</p> <p>2.8 varieties of Spoken English : Standard Indian, American and British (Note : This unit should be taught in a simple, non-technical manner, avoiding technical terms as far as possible.)</p>	12
3	<p>Introduction to Managerial Communication (12 hours)</p> <p>1.1. Communication challenges in today's work place: Advances in technology; Culturally diverse workforce; Team-based organizational Settings.</p> <p>1.2 Effective Business Presentations: Importance in managerial communication; Planning, Preparing, Organizing, Rehearsing, and Delivering Oral presentations, Handling Questions; Power Point Presentation</p> <p>Introduction to Managerial writing</p> <p>2.1. Business letters: routine and persuasive letters, bad news letters,</p>	12

First Semester B.Tech Syllabus for Admission Batch 2016-17

	<p>sales letters, job application letters.</p> <p>2.2. Writing CVs.</p> <p>2.3. Memos, notices, circulars, emails.</p> <p>2.4 Business reports and proposals.</p>	
4	<p>Soft Skills (8 hours)</p> <p>4.1. Communication skills and Soft Skills.</p> <p>4.2. Mastering the art of giving interviews, Types of interviews, Planning and Preparing for a Job Interview; Frequently Asked Questions in a Job Interview; Stages of an Interview; Important Non-verbal Aspects; Strategies for success in Job Interviews.</p> <p>4.3. Business and social etiquettes.</p> <p>Case analysis and self study assignments are compulsory</p>	8

Recommended Books:

1. Communication skill by Sanjay Kumar & PuspLata,Oxford University Press
2. An Introduction to Professional English and Soft Skills by B.K.Das et al., Cambridge University
3. A Textbook of English Phonetics for Indian Students by T.Balasubramanian/[MACMILLAN
4. A Course in english phonetics by T.R.KANSAKAR[ORIENT LONGMEN]Press.

Reference Books:

1. Technical Communication , Principle and Practice by Meenakshi Raman & Sangeeta Sharma, Oxford University Press
2. Business Communication- concepts, cases & applications,Chaturvedi & Chaturvedi, Pearson
3. Business Communication, Meenakshi Raman & Prakash Singh, Oxford
4. Communication for Management, Urmila Rai and S M Rai, HPH
5. Business and Managerial Communication, Sengupta, PHI
6. Business Communication for Managers, P. Mehra, Pearson
7. BCOM 2nd Edition, Lehman and Sinha, Cengage
8. Soft Skills K Alex, S Chand
9. Business Communication, Kalia and Agarwal, Wiley
10. Basic Communication Skills by P.Kiranmai Dutt, Geetha Rajeevan, Foundation Books

ENGLISH COMMUNICATION SKILLS (LAB)

Lab sessions will be devoted to practice activities based on all three modules of theory.

- a. phonemic transcription 5 hours
Students will be trained to find out the correct pronunciation of words with the help of a dictionary, to enable them to monitor and correct their own pronunciation.
 - i. Transcription of words and short sentences in normal English orthography (writing) into their IPA equivalents ;
 - ii. Transcription of words presented orally ;
 - iii. Conversion of words presented through IPA symbols into normal orthography iv syllable division and stress marking (in words presented in IPA form)
- b. Listening 10 hours
 - i. Listening with a focus on pronunciation (ear-training) : segmental sounds, stress, weak forms, intonationStudents should be exposed, if possible, to the following varieties of English during listening practice : Standard Indian, British and American.
- c. Speaking 15 hours
 - i. Pronunciation practice (for accent neutralization), particularly of problem sounds, in isolated words as well as sentences
 - ii. Practising word stress, rhythm in sentences, weak forms, intonation
 - iii. Reading aloud of dialogues, poems, excerpts from plays, speeches etc. for practice in pronunciation
- d. Managerial Writing 6 hours
Business letters, Advertisement, Preparing Press Releases, Press Notes, Writing themespeeches, Speeches of thanks.

(COMPUTER LAB) PROGRAMMING LAB-1

Module - I

C program - header files, C pre-processor, standard library functions, etc., identifiers, basic data types and sizes, constants, variables, arithmetic, relational and logical operators, increment and decrement operators, conditional operator, bit-wise operators, assignment operators, expressions, type conversions, conditional expressions, Input-output statements, if and switch statements, loops: -while, do-while and for statements, break, continue, etc.

- a) Write a C program to find the sum of individual digits of a positive integer.
- b) Write a C program to find Fibonacci sequence.
- c) Write a C program to generate all the prime numbers between 1 and n.
- d) Write a C program to find the roots of a quadratic equation.
- e) Write a C program to find both the largest and smallest number in a list of integers.

Module - II

Designing structured programs: - Functions, parameter passing, storage classes- extern, auto, register, static, scope rules, user defined functions, recursive functions. Arrays - concepts, declaration, definition, accessing elements, and functions, Pointers- concepts, initialization of pointer variables, pointers and function arguments, address arithmetic, Character pointers and functions, pointers to pointers, Dynamic memory management.

- a) Write C programs that use both recursive and non-recursive functions
 - i) To find the factorial of a given integer.
 - ii) To find the GCD (Greatest Common Divisor) of two given integers.
 - iii) To solve Towers of Hanoi problem.
- b) Write a C program that uses functions to perform the following:
 - i) Addition of Two Matrices
 - ii) Multiplication of Two Matrices
- c) Write a C program that uses functions to perform the following operations:
 - i) To insert a sub-string in to given main string from a given position.
 - ii) To delete n Characters from a given position in a given string.
- d) Write a C program to determine if the given string is a palindrome or not
- e) Write a C program to construct a pyramid of numbers.

Module - III

Derived types- structures- declaration, definition and initialization of structures, accessing structures, nested structures, arrays of structures, structures and functions, pointers to structures, union.

- a) Write a program to display Name, Roll Number, Marks of different subjects etc. of n number of students.
- b) Write a C program to count the lines, words and characters in a given text.
- c) Write a C program that uses structure to perform the following operations:
 - i) Reading a complex number
 - ii) Writing a complex number
 - iii) Addition of two complex numbers
 - iv) Multiplication of two complex numbers

(Note: represent complex number using a structure.)

ENGINEERING GRAPHICS

Introduction Drawing Instruments and their uses, BIS conventions, Lettering, Dimensioning line
Conventions

AUTO CAD, layout of the software, standard tool bar/menus and description of most commonly used toolbars, navigational tools. Co-ordinate system and reference planes. Definitions of HP, VP, RPP & LPP. Creation of 2D/3D environment. Selection of drawing size and scale. Commands and creation of Lines, Co-ordinate points, axes, poly-lines, square, rectangle, polygons, splines, circles, ellipse, text, move, copy, off-set, mirror, rotate, trim, extend, break, chamfer, fillet, curves, constraints. **2 - Sheets**

Orthographic Projections

Introduction, Definitions - Planes of projection, reference line and conventions employed, Projections of points in all the four quadrants, Projections of straight lines (located in First quadrant/first angle only), True and apparent lengths, True and apparent inclinations to reference planes **2 - Sheets**

Orthographic Projections of Plane Surfaces (First Angle Projection Only)

Introduction, Definitions - projections of plane surfaces - triangle, square, rectangle, rhombus, pentagon, hexagon and circle, planes in different positions by change of position method only **1-Sheet**

Projections of Solids (First Angle Projection Only)

Introduction, Definitions - Projections of right regular tetrahedron, hexahedron (cube), prisms, pyramids, cylinders and cones in different positions. **2-Sheets**

Sections and Development of Lateral Surfaces of Solids

Introduction, Section planes, Sections, Section views, Sectional views, Apparent shapes and True shapes of Sections of right regular prisms, pyramids, cylinders and cones resting with base on HP. **2 - Sheet**

Isometric Projection (Using Isometric Scale Only)

Introduction, Isometric scale, Isometric projection of simple plane figures, Isometric projection of tetrahedron, hexahedron (cube), right regular prisms, pyramids, cylinders, cones, spheres, cut spheres. **2-Sheets**

Text Books

1. Engineering Drawing - N.D. Bhatt & V.M. Panchal, Charotar Publishing House, Gujarat.
2. Computer Aided Engineering Drawing - S. Trymbaka Murthy, 4th Ed, University Press
3. Engineering Drawing by N.S. Parthasarathy and Vela Murali Oxford University Press

Reference Books

1. Engineering Graphics - K.R. Gopalakrishna, Subash Publishers Bangalore.
2. Fundamentals of Engineering Drawing with an Introduction to Interactive Computer Graphics for Design and Production - Luzadder Warren J., Duff John M., Eastern Economy Edition, Prentice-Hall of India Pvt. Ltd., New Delhi.
3. Computer Aided Engineering drawing, Prof. M. H. Annaiah, New Age International Publisher, New Delhi

ENGINEERING WORKSHOP

Fitting Practice:

Use of hand tools in fitting, preparing a male and female joint of M.S. or making a paper weight of M.S.

Welding Practice :

Gas welding & Electric Arc welding Practice.

A joint such as a Lap joint, a T-joint or a Butt joint is to be prepared or to make furniture.

Machining:

(i) Stepped cylindrical Turning of a job and Thread-cutting in lathe.

(ii) Shaping (iii) Milling

Reference

1. Elements of Workshop Technology, Vol. I and II by Hajra choudhary, Khanna Publishers
2. Workshop Technology by WAJ Chapman, Viva Books
3. Workshop Manual by Kannaiah/ Narayana, Scitech
