Other Details:

How to prepare for the interview and technical assessment:

The interviewer is looking for evidence of your problem-solving skills, technical expertise, and passion for the latest technologies. In the brief interaction, consider sharing your GitHub profile and the code you may have written. You can also specify your achievements on coding platforms like HackerRank, Topcoder, CodeChef, etc.

Review the basics of Database courses, Data Structures and Algorithms, and Machine Learning related courses. You can complete Coursera and edX courses to brush up on your knowledge.

Review two books by Rajeev Agarwal to understand work culture and expectations from employers. These books may be available in library.
